Two days ago I replaced the stock 3,3 mF Mundorf/silver/gold with the v-caps. The Mundorfs are probably one of the best caps any manufacturer put into their speakers.

This was an expensive gamble since I couldn't find anyone on this forum or Audiogon who has ever modded XO with these expensive caps.

I was lucky enough that Chris offered me to put them for 4 days on the cable cooker which acc to him is the same as many hundred hours of normal use so the caps were almost completely burned in.

Well at 7.30 pm I finished the installation and couldn't stop listening to jmusic until 7am the next morning and didn't make it to the office. These are so much better than the Mundorfs right from the start it is scary.

With shipping to my area in the far East they costs almost 1K but this is one of the best investments in Audio I've ever made. Highly recommended!

regards

Michael
